

# ORC-4DC

ITEM NO: 12497

The Orcomm 4 Door Controller is designed for both residential and commercial environments, offering flexibility and robustness with Wiegand, RS485, and TCP/IP communication. Each controller can connect to our Advanced Management Software or operate independently via a web server client. It can manage four zones—gates, barriers, and electronic doors—using onboard 10A relays. Fire alarm inputs are ideal for opening or closing doors during emergencies, while additional alarm inputs/outputs enable the controller to be programmed for enhanced functionalities.

## SPECIFICATION

Size	218mm×130mm×23mm	Weight	0.22kg
Finish	Grey	Box	285mm×240mm×82mm
Box Weight	1.6kg	Box Finish	Black

## SPECIFICATION

Power	<1W	Power Protection	10 Years
Voltage	12VDC	Current	<120mA
Temperature	<60°C	Humidity	10% ~ 95% R.H
Card Holder	30,000	Logs	60,000
Alarm Capacity	10,000	Communication	TCP/IP
Distance	100 Meters	Card Reading	Wiegand
Opening Methods	4 pcs (WG/HID/Motorola/Wiegand)	Fire/Alarm Output	1 pcs
Fire/Alarm Input	1 pcs	Release Button	4 pcs
Door Sensor Input	4 pcs	Lock Output	4 pcs
